

Advanced Cleaning Fibers

Zabada is crusading to rid homes, and the planet, of crazy poisonous chemical cleaners. We're taking a stand against yucky chemicals that leave yucky toxic residues and emissions for your skin to absorb and kids to breathe – chemicals known to poison and cause us serious harm. We're crusaders with integrity and a solution that's scientifically proven to clean better, faster and healthier. And joining our mission are millions of households across Europe and Australasia who've already shed the hazmat suit and converted to chemical-free living with the Zabada system.

Alicia Silverstone Yodels about Zabada Clean

Here at Zabada we're doing a massive rooftop Yodel after one of our favorite eco-celebs, Alicia Silverstone made the Zabada Clean change and sent us this awesome review.

"I was amazed after receiving these products. It is so refreshing to have a simple and eco cleaning system that will save me a trip to the store for a very long time. I had no idea that there was a full cleaning system out there that is so easy to use, and works without using anything but water and these fuzzy fiber gloves!

What's the Zabada fiber cleaning system?

It's an Austrian-made and engineered range of advanced cleaning fibers and microfiber cloths, the likes of which no grease, grime or bacteria have ever seen before in the US. Zabada fibers are deeper, thicker and superior in quality compared to your average microfiber cloth. They're made and hand-sewn in Austria to exacting European ISO* standards. They're cut 100 times finer than a human hair to reach in and grab every particle from every kind of surface. And all they need to remove dirt and bacteria is a little water – the stuff that's safe for your kids to drink.

What can Zabada do for you?

Zabada is the only complete cleaning system that's scientifically-proven to:

Rid homes of 90% of harmful chemicals

Remove up to 99% of bacteria

Clean faster with a simple wet and wipe

Last 2 to 3 years and save you money

Outlast generic microfiber cloths that lose cleaning power after 20 washes

Reduce water consumption by 20%

Zabada product range
